

# EGYPTIAN PSM STANDARDS IMPLEMENTATION

TUESDAY, **JULY 30**, 2024

**1pm** EGY / **5am** CST / **11am** UK

LIVE WEBINAR  
HOSTED BY

**BAKERRISK**  
IDENTIFY · EVALUATE · SOLVE

BakerRisk has 40+ years' operational, process safety and managerial responsibility worldwide in high-hazard chemical manufacturing. BakerRisk has been a member of IChemE UK Hazards Conference Technical Committee since 2014.

This is the third webinar in the Egyptian PSM Standards Implementation series. This webinar will cover several key parameters that affect Mechanical Integrity (MI), common damage mechanisms and life-limiting mechanisms seen in industry. This webinar will be valuable for anyone involved in, or responsible for the design, operation, maintenance, inspection, testing or assurance of Safety Critical Elements (SCE) and Safety Critical Systems (SCS) used in high-hazard, process safety operations.

## ASSET INTEGRITY PROGRAM IN SUPPORT OF THE PSM PROGRAM FOR EGYPT

- Understand why **Asset Integrity Management (AIM)** is needed
- Understand some of the elements of a good Asset Integrity Management program
- Consider the value of doing **Damage Mechanism Reviews (DMRs)**
- Be aware of many potential **service-induced damage mechanisms**, such as ductile, brittle, or environmental-induced failures and the potential for damage during service
- **Encourage investigations and trending** of routine near-misses and precursor to failures

## PRESENTERS

**Daniel J. Benac**  
PE, CFI

*Manager, Materials  
Engineering & Forensics*

**Michael Nugent**

*Consultant, Materials  
Engineering and Forensics*

**Wayne Repich**

*Global Director, Business  
Development  
and Marketing/  
Communications  
Key Account Program  
Director*
